

Interposer Assembly Card

FR4 INTERPOSER ASSEMBLY CARD

This is a value-added business. We provide a one-stop solution that includes the making of connectors and the SMT processes. This business model improves supply chain management. And, this product range supports Storage, Consumer, and Communication applications.

- Using water soluble, lead-free, halogen-free assembly processes

FEATURES

- One stop solution
- Connector supply chain
- Quality

BENEFITS

- We can provide all the required connectors. This allows the end customer can focus on the modular product rather than the component. This proposed business model gives cost reduction to the customer's manufacturing process
- We are able to control the connector supply chain as long as it is built within the same factory management
- With the fast feedback loop, we help control the quality of the modular product
